## **DETAILED ACTION**

## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Invention I: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes having a finger-shaped pattern.

Invention II: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes being in parallel and having a P-shaped pattern.

Invention III: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes having a P-shaped pattern and the second electrode being disposed adjacent the first electrode.

Invention IV: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises a triangle-shaped pattern, a part of said triangle-shaped pattern being cut so as to form first and second electrodes.

Invention V: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes being disposed in parallel so as to form a rail-shaped pattern.

Invention VI: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes, the

Application/Control Number: 09/487,173

Art Unit: 2815

first electrode having a U-shaped pattern and the second electrode having an I-shaped pattern.

Invention VII: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes, the first and second each having a coil-shape pattern.

Invention VIII: an image detector comprising a conductive object detection pattern wherein the conductive object detection pattern comprises first and second electrodes, the first electrode having spiral-shaped pattern and the second electrode being disposed adjacent to the first electrode.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Application/Control Number: 09/487,173

Art Unit: 2815

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

## INFORMATION ON HOW TO CONTACT THE USPTO

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene Lee whose telephone number is 703-305-5695. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie C. Lee can be reached on 703-308-1690. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
